

The Digital Door Viewer™

Commercial Applications

The Digital Door Viewer™ (DDV) replaces peephole door viewers with an electronic video system delivering an on-demand, high quality exterior view.

The DDV provides an expanded field of view from a comfortable viewing distance.

The Digital Door Viewer is quick and easy to install in any door. Requires no connection to external power wiring or external monitor displays.

Just press the button to see who's at the door.

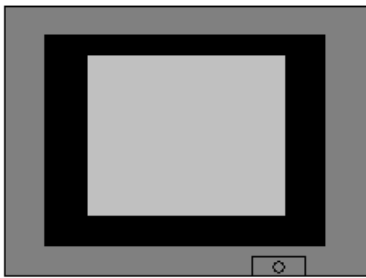

The 5.6 inch LCD mounts on the inside of the door and gives a large, clear view. The high resolution color camera is mounted into the door and delivers a sharp image in all lighting levels.

The DDV installs in just minutes. It operates on 8 standard "AA" size batteries. In typical operation, the batteries last for one year.
